

## PROGRAM

**Friday, 19/05/2017**

## 11<sup>th</sup> International Young Geomorphologists Meeting Ammersee, 19.-21.05.2017

- 16:00**      **Arrival**
- 17:00**      **Get to know the program and the group**  
Let's learn some names and share a drink
- 18:00**      *Dinner*
- 19:20**      **Session I: "Landslides and Loess" Convener: Jan Blöthe**

You have 20 minutes for your topic, so make your talk short and to the point and have plenty of time for discussion!

- 19:20      *Gabriele Amato* (Roma Tre University): PSInSAR time series analysis to characterize the San Vito Romano rockslide (Central Italy).
- 19:40      *Katarzyna Luszczynska* (University of Silesia in Katowice): Mapping landslide activity and hazard from tree rings (Western Carpathians, Poland).
- 20:00      *Jörn Profe* (University of Bremen): Chemostratigraphy of the loess-paleosol sequence Süttö (Hungary) based on unsupervised clustering of X-ray fluorescence data.

**20:20**      **Late night shorts ("30 second madness") and poster session – Convener: Philipp Schulte**

You have 30 SECONDS to present your topic on one slide. After the short introductions we'll continue discussing the posters with some cool drinks.

- Lorenz Banzer* (University of Bonn): Active layer variability of an active rock glacier complex in the Argentinean Andes.
- Fabian Becker* (FU Berlin): Compositional data analysis of the environmental impact of pre-industrial iron smelting on Elba Island.
- Heidi Bernsteiner* (University of Salzburg): Postglacial evolution and recent siltation of the protected lake "Taferlklaussee" (Austria).
- Giuseppe Corrado* (Università di Napoli "Parthenope"): Morphometric analysis of fault scarps from the Alburni Massif; southern Italy.
- Robert Delleske* (Georesearch Forschungsgesellschaft GmbH): Meeting the Challenges of UAS Flight Planning in High Alpine Environments.
- Julius Isigkeit* (University of Bonn): Geomorphology of the Morenas Coloradas rock glacier complex, semi-arid Andes of Argentina.
- Andrea Junge* (Gießen University): Open cisterns as environmental archives in the Negev Highlands, Israel.
- Sybille Knapp* (TU Munich): Large rock-slope failures impacting on lakes.
- Annegret Larsen* (Université de Lausanne): The hydro-geomorphic influence of beaver on low-order streams.
- Julia Meister* (FU Berlin): A pastoral landscape for millennia: Investigating pastoral mobility in northeastern Jordan using quantitative spatial analyses.
- Ingo Middelhaufe* (FU Berlin): Water Harvesting Systems in the Dry Zone of Sri Lanka.
- Sarah Mossner* (FU Berlin): Holocene environmental implications from a small crater lake in Central Yakutia, Russia - preliminary results.

- Aleksandra Osika* (University of Silesia in Katowice): Relief evolution of landslide slopes in the Suche Mts. (Central Sudetes, Poland) - analysis of a high-resolution DEM based on airborne LiDAR.
- Bastian Reinwarth* (University of Jena): Modelling the sediment trap efficiency of semi-dry reservoirs in the Kruger National Park, South Africa.
- Oliver Schlömer* (University of Bonn): Submergence effects on scour at obstacles in the fluvial environment.
- Anna Schoch* (University of Bonn): Postglacial fan evolution in the Upper Rhone Valley, Switzerland – gradual or catastrophic?.
- Raphael Steup* (Geißen University): Reconstruction of Holocene sediment dynamics in a human-impacted fluvial system of the Northern Franconian Jura.
- Simon Terweh* (University of Bonn): Biotic effects on sediment transport in river systems - first insights from the Bioscape IV project.
- Vittoria Vandelli* (University of Modena and Reggio Emilia): Glacier fluctuations in the Italian Alps since the LGM, a case study from the Dolomites: review and perspectives within a 3-years PhD project.
- Janek Walk* (RWTH Aachen): Pléiades DEM-based morphometry of coastal alluvial fans in Chile's Atacama Desert - DEM quality assessment and first results from the Devil's Throat (Garganta del Diablo), southern Tarapacá region.

## **Saturday, 20/05/2017**

- 08:00-9:30 *Breakfast*
- 10:00** **Keynote: Dr. Wolfgang Schwanghardt (University of Potsdam): Models, parameters, and the unknown unknowns - issues in Landscape Evolution Modelling. Moderation: Jan Blöthe & Julia Meister**
- 12:00** **Lunch**
- 14:00** **Field trip to the surroundings: Prof. Michael Krautblatter, TU Munich**
- 17:00** **Return from field trip**
- 18:00** **Dinner**
- 19:00** **General Assembly**
- 20:00** **Poster session**
- 21:30** **Party / Get together**

## **Sunday, 21/05/2017**

- 08:00 *Breakfast*
- 09:00** **Session II: “(High) Mountain geomorphology” Convener: Andrea Junge & Anna Schoch**

You have 20 minutes for your topic, so make your talk short and to the point to have plenty of time for discussion!

- 09:00 *Julian Trappe* (University of Würzburg): Hydrology of partly drained bogs in the Hunsrueck mountains.
- 09:20 *Christina Hauck* (University of Vienna): Combining hydrometeorological data with 4D-ERT information to determine landslide dynamics in Gresten, Lower Austria.

- 09:40 *Sarah Kamleitner* (University of Vienna): Is there still dead ice in the Little Ice Age lateral moraine? A case study from Kaunertal valley, Austria.
- 10:00 *Johannes Buckel* (University of Salzburg): The formation of glacial lakes in Austria since the Little Ice Age.
- 10:20 *Coffee Break*
- 11:00 “Q&A 10 years later – open discussion with the “older” Young Geomorphologists”**  
**Convener: Young Geomorphologists’ team**
- Foundation and development of the Young Geomorphologist in Germany – What have we accomplished and what are our next goals?
- 12:00 *Lunch*
- 13:00 Give us what we deserve!**  
We need your opinion on what you liked and disliked!
- 13:30 Goodbye and some final remarks**
